

## Jenny Pattison

I've been working in the graphic design industry for fourteen years in both the corporate and independent design firm environments. Four and half years ago I made the decision to focus full time on JPG Design Studio. Within those years I've been fortunate to work with a variety of local businesses on a large range of projects such as logos, annual reports, magazines, brochures, event banners, and everything in-between. I've also had the pleasure to be part of the York County Chamber for four year as well as being on the board for my second year.

Jenny Pattison (Owner/Designer)
